## Hot Sell Market

1. Middle East
2. South America
3. South Africa
4. United State
5. Asia

## Manufacturer Specification

### Technical Data

Rate Voltage: 12V;

Operation Voltage Range: 9-16V;

Rated Current: 20-200mA;

Detecting Distance: 0-2.5m;

Ultrasonic Frequency: 40KHz;

Working Temperature: -20 - + 70I;

Display Working Temperature: -20 - + 60I;

### Packaging Details

Package Type: Plastic Bag with Economic Gift Box;

Item Height: 10 cm;

Item Length: 30 cm;

Item Width: 25 cm;

Item Weight: 2.69 kg;

Unit Type: piece;

Package Weight: 3.69 kg;

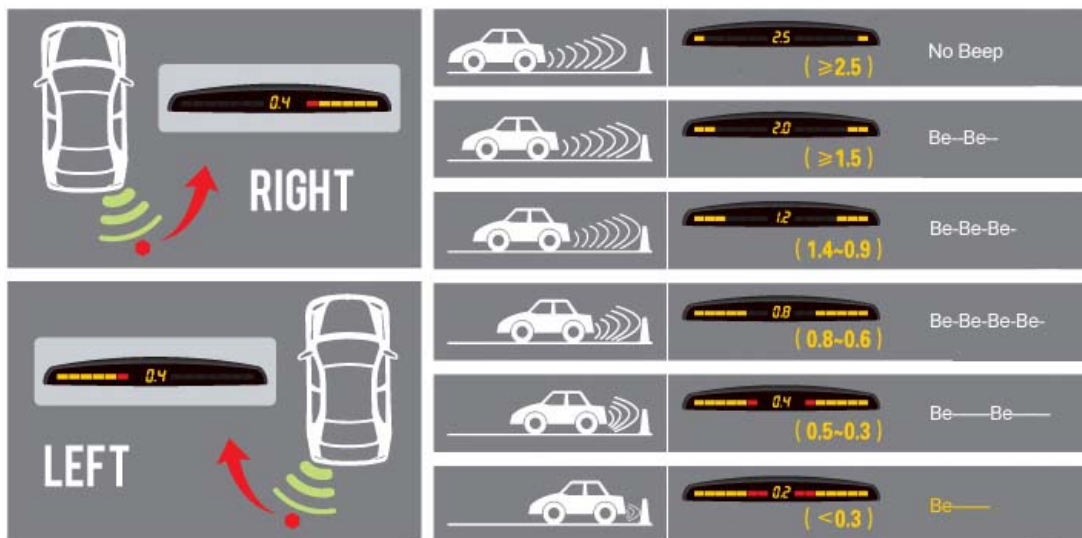

Package Size: 32cm x 27cm x 13cm;

Notice: VT-1207 Sample is economic packaging with plastic bag and gift box.

## How Parking Sensor VT-1207 Work

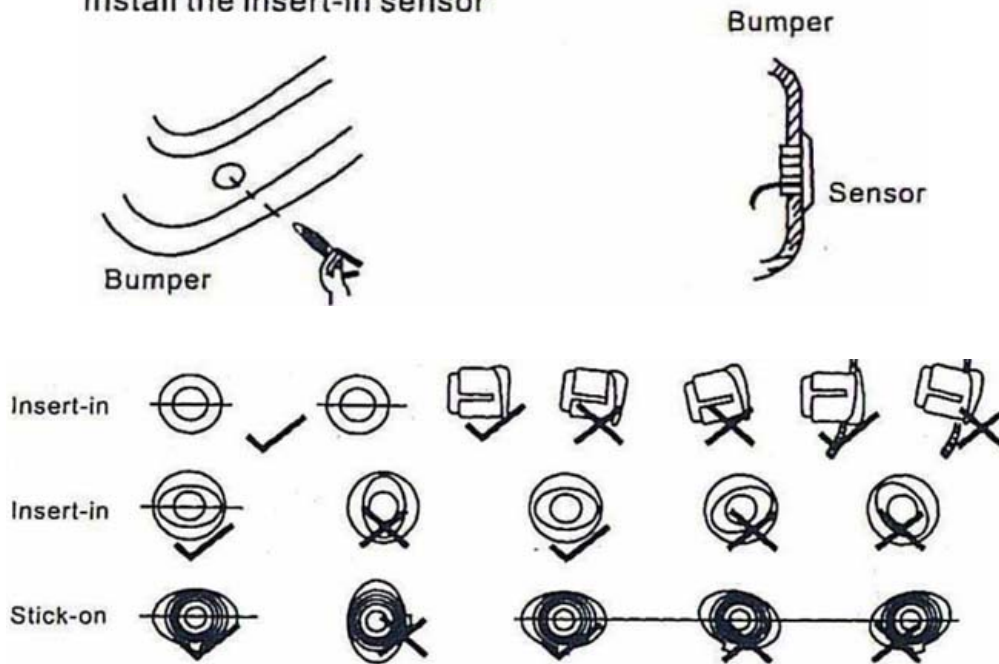

The parking sensor emit different alarm sounds according different sensing range to remind the driver in car, also the LED display show different colors to give the driver alert. There are 5 alarm stages in this parking sensor system, safe area in distance between 110-250cm, when sensing range between 60-100cm, it is alert area, and the dangerous area is 0-30cm, the alarm sounds will change by the distance and the LED light will change the color automatically.

### Parking Sensor Installation Guide

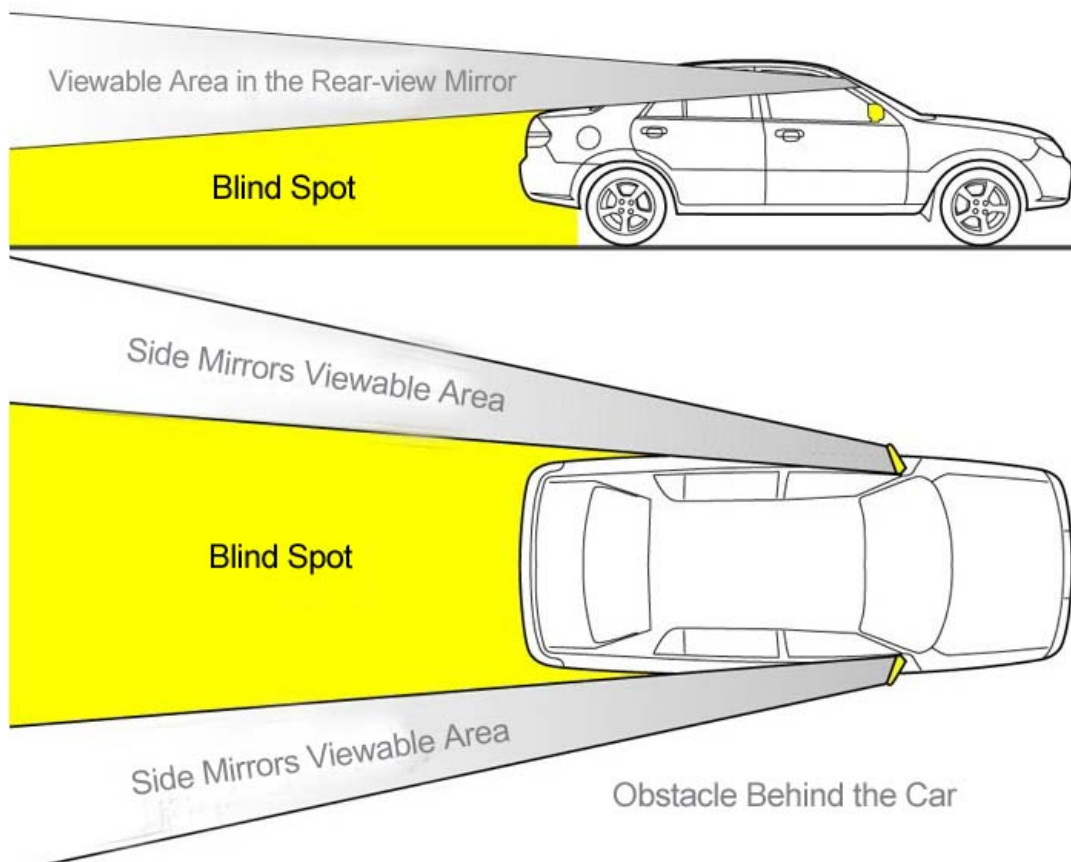

## Install the insert-in sensor

Be sure no other parts of the cars falls into the detecting range of the sensors so as to avoid the false detection. The best install position for 2 sensors and 4 sensors is different, for 2 sensors, horizontal spacing between the two camera is 0.6m to 0.8m. And for 4 sensors, horizontal spacing between each sensors is 0.3m to 0.4m. When installing the sensor, driller and bumper is in need.

## Why Buy Parking Sensor Systems

The rear view mirror of the car is not exhaustive for every angle, when parking the car, some blind spots is not easy to detect. As the pictures shows above, there is a wide range of blind spot can not shows in the rear view mirror, it is easy to touch the obstacles behind the car and damage the cars. In addition, when parking the car in the bad weather, rainwater and snowflake makes the car windows fuzzy, greatly enhance the difficulty for obstacles judgement. So the parking sensor is very necessary for cars.
